EDUCATION

Wuhan University, Wuhan, China 09/2021 – 06/2025
B.Eng. Software Engineering GPA: 3.73/4.00
Courses: System-Level Programming, Data Structures, Computer Organization, Operating Systems, Machine Learning, Database Systems, Discrete Mathematics, Linear Algebra, Probability & Statistics, etc.

University of Tübingen, Tübingen, Germany 10/2025 – present
M.Sc. Computational Neuroscience GPA: 1.4/1.0
Courses: Neural Dynamics, Neural Modeling, Neurophysiology, etc.

RESEARCH EXPERIENCE

RNN Analysis on Same-Different Task 09/2024 – 11/2024
Chinese University of Hong Kong | Advisor: Dr. Xiangbin Teng Remote

- **Model Training:** Trained RNNs on the same-different task under varying noise levels by neurogym, optimizing the code for readability and extensibility.
- **Model Analysis:** Analyzed normalized averages and principal components of RNN hidden states, performed linear fitting of activities at different time points to stimuli values, and analyzed the temporal scope.

Large Model Based Crossmodal Chinese Poetry Creation 07/2024 – 10/2024
Wuhan University | Advisor: Dr. Weiping Zhu Wuhan, China

- **System Development:** Led the development of modules supporting cross-modal text and image inputs by miniGPT-4 and CLIP, enhancing iterative optimization mechanisms.
- **System Evaluation:** Evaluated poem quality across different input modalities, and the effect of optimization on three poem sets.

Data Analysis on Forward-Flow Task 04/2024 – 06/2024
Beijing Normal University | Advisor: Prof. Yunzhe Liu Remote

- **Data Preprocessing:** Pre-processed word data for forward flow tasks, inserting seed words, removing duplicates, and generating embeddings.
- **Correlation Analysis:** Analyzed the correlation between participants' scale scores and statistical indicators, including sequence length, embedding similarity, optimality divergence, semantic distance range, and "forward flow".

PROJECT EXPERIENCE

The Working Memory Capacity of RNN models 07/2024 – 08/2024
Computational Neuroscience Program, Neuromatch Academy

- **Memory Decoding:** Built a neural network to decode firing rates into previous inputs, computing correlations to assess the WM capacity of RNN models.
- **Parameter Exploration:** Led the exploration of effects of parameter simulating biological factors and interactions on WM capacity.

HONORS & AWARDS

2021 Excellent Student Scholarship Third-class Reward (1,000 ¥)
2021 Excellent Student Cadre
2021 Advanced Individual of Social Work

SKILLS

Programming: Python, C/C++, JAVA
Tools: Unix Shell, Git/GitHub, E-prime, Zotero
Language: English(IELTS 7.0), Mandarin Chinese(native)
